S N - 1 9 A

SN-19A is an additive for wet-process which promotes quick removal of DMF from PU-coating solutions and prevents inconsistent discoloration that appears on the artificial leather after buffing.

Specification

Appearance : Transparent liquid
Effective ingredient : 100%
Ionic property : Nonionic

Characteristics

Improves coagulation speed
Promotes uniform and quick removal of DMF
Prevents inconsistent discoloration on the Nubuk
Removes the foam of the mixed compound quickly
Improves surface smoothness
No or less effect on color and adhesion strength

Recommendable use-level

For ether/ester polyol type resin : 0.1-0.5 phr
For ester polyol type resin : 0.1-0.3 phr

Packaging

20kg / plastic can , 200kg / steel drum
